## Drive Productivity, Security & Efficiencies in Your School with Dispatcher Phoenix

Dispatcher Phoenix Education is an advanced document workflow solution that automates the redundant and time-consuming tasks educators face daily, such as grading tests, protecting student privacy, managing transcript data, and more. With this solution, education institutions will drive productivity, improve efficiencies, and enhance the collaboration between students and teachers, creating a stronger learning environment. Here are a few examples of challenges that educators and school administrators face and how Dispatcher Phoenix can help:

### **CHALLENGE: Long Grading Process Delays Time for Teaching**

Professors and teachers face an overwhelming volume of paperwork every year. Schools are required to test their students to ensure they are comprehending what is being taught, allowing them to grow as learners. Grading exams is extremely time consuming for teachers, but automatic grading solutions in today's market require schools to purchase bubble sheet answer forms which are extremely expensive.

### **SOLUTION: Dispatcher Phoenix Bubble Grader for Automated Test Scoring and Reporting**

Dispatcher Phoenix Bubble Grader is a cost-effective solution that makes creating and grading exams simpler. Educators can easily create their own bubble sheet tests and print them out on plain paper, eliminating the need to purchase or store preprinted tests. This solution comes with a web-based Bubble Sheet Generator tool that allows teachers to customize their tests with a specific number of questions/answers, weighted questions, unique test IDs, exam details, and more. Once the testing has been completed, Dispatcher Phoenix will automatically grade exams and create comprehensive test reports to allow educators to analyze classroom performance and better meet their students' learning needs.

### **CHALLENGE: Document Overload Leads to Mishandling & Limits Physical Storage**

Classrooms and administration offices lined with filing cabinets and overwhelming stacks of paper documents create stress for administrators, teachers, and students. The lack of organization leads to misplacing or losing important documents, which interrupts productivity.

### **SOLUTION: Dispatcher Phoenix for Automated File Collection and Distribution**

Using a Dispatcher Phoenix automated workflow, schools can automatically capture, index, process and route documents and data in a single step. For simple scanning workflows, educators can approach any networked MFP and using a Windows-like folder browsing interface, intuitively scan and upload documents for processing through a workflow. To streamline your education workflows, Dispatcher Phoenix offers single-sign on direct connections to popular content management systems and cloud storage providers including, Box, Dropbox, One Drive, Google Drive, SharePoint, SharePoint Online, and more. Dispatcher Phoenix Web makes it quick and easy for educators to configure and manage their cloud storage accounts for single sign-on to a Scan-to-Cloud workflow.

### **CHALLENGE: Document and Data Security within Student Records**

Today, document security is of paramount importance for any organization. Identity theft, and espionage have elevated document security as a pressing issue for every organization. With the strict personal information safety standards of the Family Educational Rights and Privacy Act (FERPA), education organizations struggle to protect students' private information while keeping up with the tremendous amount of incoming documents and forms that this paper intensive industry receives.

### **SOLUTION: Dispatcher Phoenix Education for Secure Document Processing**

With Dispatcher Phoenix Education, educators can automatically secure confidential student records and other documents. With an automated workflow, sensitive information can be permanently removed via intelligent redaction, and files can be automatically converted to password-protected PDFs to ensure confidentiality. In addition, Dispatcher Phoenix offers Release2Me, a convenient and secure print release system to ensure that confidential documents are never left uncollected on the printer.
