

Giving Shape to Ideas

Easy Access.

With Dispatcher Phoenix OneDrive and OneDrive for Business Connectors.

connect

For simple, secure cloud file storage, Dispatcher® Phoenix's OneDrive Connectors let you scan, process and distribute files to Microsoft® OneDrive or Microsoft OneDrive for Business – leveraging the power of your bizhub® MFP and ensuring that your information is always accessible and secure.

 **Dispatcher**
Phoenix

Online File Storage for Everyone.

Ideal for Every Application.

Now everyone has a choice of connectors targeted to specific business needs. The OneDrive Connector allows you to easily store your files on Microsoft OneDrive for access, sharing and collaboration. We also provide a connector to Microsoft's OneDrive for Business solution. As part of Office 365 or SharePoint Server 2013, OneDrive for Business lets you load and update private files from anywhere, share files with specific co-workers, and collaborate on Office documents placed in your "Shared with Everyone" folder.

Simple, Secure Access.

Using Dispatcher Phoenix OneDrive Connectors, it's easy to share mission-critical information from any networked location. Salespeople, mobile professionals and collaborators in legal, healthcare, education and other specialized applications will have easier access to essential data – the key to higher productivity.

Capture, Process, Upload.

You can submit files from iOS and Android mobile devices, collect files from local or network folders and MFP user boxes, even scan directly from your bizhub or other networked MFP. And before uploading, documents can be automatically converted to PDF or Microsoft Word format, renamed, Bates stamped, watermarked and much more.

A Visually Enhanced Display.

On your bizhub touchscreen, you can log into OneDrive or OneDrive for Business, view files and folders in a familiar Windows Explorer-like display, create a new folder – then scan and upload your document.

A Fully Automated Workflow.

For a total hands-free scanning and storage solution, you can customize an automated Dispatcher Phoenix workflow to send files to a specific folder or create a folder in OneDrive or OneDrive for Business using file metadata while your workflow runs.

Essential for Higher Productivity.

Both connectors are simple to operate, offering secure storage that on-site or media backup can't equal. You can log on directly at your bizhub touchscreen, scan documents to your account, even save time by automating manual processing and formatting tasks before your files are stored. And these connectors are included in the versatile Dispatcher Phoenix cloud storage bundle, which also gives you connectors to Box[®], Dropbox[®], WebDAV, FileAssist[®], Google Drive[®] and FilesAnywhere[®].
