TECHNOLOGY

# SECURE YOUR DOCUMENTS. **RIGHT AT THE MFP.**

**The documents you need, released only to authenticated users.  
That's protection and efficiency all in one.**

Every day, businesses like yours face the same problem: confidential or sensitive documents left at the printer for all eyes to see; multitudes of documents printed by mistake; or printouts that simply go unclaimed in the output tray all day long. Dispatcher® Phoenix's Release2Me solves these print management challenges by holding your documents in the queue until an authenticated user releases them at the MFP. It does more than protect private data — it allows you to control when, where and who prints documents, saving time and paper.

# IT'S PEACE OF MIND THAT'S ALSO **GOOD FOR BUSINESS.**

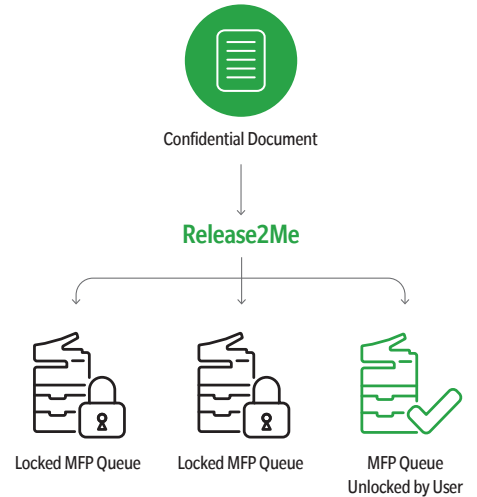

**Optimize business productivity. Reduce overall print waste and costs.  
And protect confidential information.**

At Konica Minolta, we know your organization is always looking to make your processes more efficient and cost-effective. By holding jobs in the print queue, Dispatcher Phoenix Release2Me allows your employees to securely print documents and help control costs. Authorized employees can print documents to the secure Release2Me print queue, approach any networked MFP and decide which jobs to print, save for future use or delete from their queue. Your business will benefit from:

- Reducing the amount of paper, toner, time, energy and thereby costs caused by duplicate, accidental or error-filled printouts
- Increasing security because documents won't be printed until the authenticated user is present at the MFP

No more rushing to the printer to pick up confidential documents — and no more wasting time and consumables.

## Edit, remove or print any document on the spot — at any MFP.

### INCREASE CONVENIENCE

Print on your own terms. Giving you the flexibility you need, Release2Me allows you to print your documents anytime, at any printer you choose. You only go to a printer when you're ready to print out your document. And if a device runs out of paper or toner, just go to another MFP and access your print job there — no waiting, no hassle. You can also select print settings before your document is printed. Choose the number of copies to print, staple all pages and more — right at the MFP.

### REDUCE COSTS

Accidental printing leads to wasted paper and toner - straining budgets and reducing efficiency. Release2Me helps control print costs by allowing users to delete unnecessary or unused jobs right at the MFP. Release2Me also tracks device usage and user engagement, giving management a clear view of printer use. It can even enforce environmentally-conscious rules, such as duplex printing, to further reduce costs and waste.

### ENHANCED ANALYTICS

With Release2Me Print Reporting, businesses gain insight into their print infrastructure. Managers or administrators can create customizable reports in Dispatcher Phoenix Web. Using the convenient, web-based reporting tool, managers can proactively analyze their print environment using Visual or Table reports. With Visual reports, administrators are presented with a graphic review of their print data. Using Table reports, businesses can customize the data points needed for review and export the report as a CSV for further analysis.

### IMPROVE CONTROL

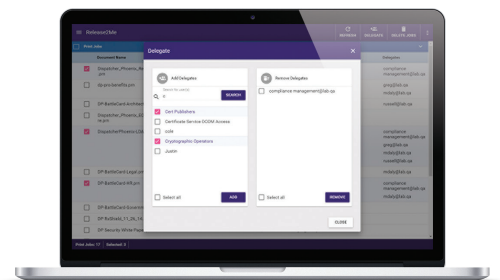

Now you have control over managing and customizing the print queue using Print Delegation. Managers and employees can share or delegate print jobs to ensure teams have the information they need available to them at the MFP. For example, SMBs can easily share marketing and sales collateral to every employee for ease of printing. Managers can also quickly delegate print jobs to admins, such as expense reports or travel itineraries. Using Print Delegation, businesses can further secure print workflows and paper documentation to maintain the confidentiality of propriety business information or personally identifiable information (PII).

### SPEED WORKFLOW

Get started quickly. Dispatcher Phoenix's Release2Me comes with a simple, predefined workflow that is easy to use with minimal setup necessary. If advanced configuration is required to address specific business needs, this solution also provides individual tools that can be used to customize more complex workflows.

### MOBILE FOR TODAY'S WORKPLACE

Release2Me also works with the Dispatcher Phoenix Mobile app so mobile workers can release prints from their smart phones or tablets.

# BUILT TO SUIT YOUR BUSINESS NEEDS.

The Dispatcher Phoenix family of automated document workflow solutions also includes:

## DISPATCHER PHOENIX SCANTRIP

Perfect for businesses of all sizes, Dispatcher Phoenix ScanTrip simplifies core scanning workflows, including extracting data from paper and electronic files, converting documents to searchable PDFs, distributing documents to popular cloud applications, and more.

## DISPATCHER PHOENIX RELEASE2ME+

As a convenient and secure follow-you print solution, Release2Me+ enables organizations to further secure their print and scan-to workflows while utilizing OCR capabilities for data extraction and document conversion.

## DISPATCHER PHOENIX

An advanced document processing and workflow automation solution with sophisticated tools for rules-based file distribution. To address the specific needs of our vertical market customers, optional packages are also available to be added onto the Dispatcher Phoenix license, including:

**Legal:** Speed up and simplify legal document processing with automated Bates stamping, redaction, connectors to document management systems and more.

**Finance:** Capture, process and distribute financial documents with automated file conversion, advanced OCR and more.

**Education:** Advanced features for educators include an automated bubble sheet grading solution, a web-based bubble sheet generator tool and more.

**Government:** Helps state and federal agencies manage documents with greater security and accessibility. Includes Dispatcher Phoenix's Copy Defender functionality to secure printed documents, along with support for CAC/PIV authentication and Scan-to-Me/Scan-to-Home capabilities.

**Healthcare:** Advanced document workflow for processing, sharing and securing patient information, including a direct connector to OnBase® by Hyland, a secure prescription print solution and Scan-to-EHR capabilities via HL7 Connector and CDA Generator.

**ECM:** Manage unstructured content with powerful batch scanning and indexing capabilities. Features a Desktop workstation that connects to any high-speed, TWAIN-based scanner, along with web-based batch indexing, document verification and batch reporting tools.

## MORE WORKFLOW FLEXIBILITY

### Modular Add-On Options

Dispatcher Phoenix is scalable, allowing you to add additional features once your business needs change. Options include forms processing, document classification, barcode processing, redaction, advanced job routing and much more.

### Multiple Connectors Available

Other connectors to popular content management systems and Cloud storage service solutions are available, including: Box.com, Dropbox, FileAssist, Google Drive, Laserfiche, M-Files, Microsoft SharePoint, OnBase, OneDrive, OneDrive for Business, SharePoint Online, WebDAV, Workshare, Worldox.
