Run Your Business Faster And Smarter!

Achieve a cost-effective document processing solution.

Priced well below industry standards, Dispatcher Phoenix Foundations offers a full-featured and comprehensive document processing solution.

Maximize productivity and reduce labor costs.

Automate your most time consuming tasks with Dispatcher Phoenix Foundations. Eliminating the need for manual intervention, Dispatcher Phoenix Foundations features automatic file collection, processing, and distribution. Also, documents can be automatically annotated and watermarked as well as renamed, split, and merged -- all at the touch of a button.

Customize workflows quickly.

Dispatcher Phoenix Foundations comes with a built-in, graphical Workflow Builder that allows you to create your workflow intuitively and easily. The Workflow Builder includes drag-and-drop functionality, vibrant visuals, drawing tools, customizable icons, multiple connectors, easy-to-understand workflow validation messages, and more.

Take advantage of bEST technology.

With Dispatcher Phoenix's integration with bEST (bizhub Extended Solution Technology), a suite of cutting-edge technologies that bring the power of the PC to Konica Minolta devices, you can scan documents into your workflow directly from the MFP control panel. And the Web browser (i-Option) is not required since bEST workflows can run on both graphical and native MFP user interfaces.

Optimize the application to best suit your needs.

Dispatcher Phoenix Foundations' flexible architecture allows you to expand the application as your needs change. Optional modules are available for purchase at any time, including advanced Bates stamping, zonal OCR, PDF conversion, Microsoft Office conversion, Barcode processing, and much more.

Find out more about why Dispatcher Phoenix Foundations is the right document processing solution for your business! Contact your local Konica Minolta sales representative for more information.
