OPTIMIZE YOUR PRODUCTIVITY
WITH AUTOMATED DOCUMENT CLASSIFICATION

Accelerate document recognition with Dispatcher Phoenix Doc-Classifier.

Document classification is a labor-intensive process. It takes hours to manually find documents, categorize them, and sort them into groups. And without an accurate document classification system, critical information can't be accessed and vital enterprise documents could be lost. To streamline document processing workflows and help organizations lower operating costs, Dispatcher Phoenix's Doc-Classifier intelligently and accurately categorizes and classifies incoming documents and files - with no human intervention required! Doc-Classifier organizes and identifies operational documents, business forms, and other types of files from different industries, such as Finance, Healthcare, Legal, Insurance, and Education.

Dispatcher
Phoenix

WORKFLOW AUTOMATION THAT'S
GOOD FOR BUSINESS.

Capture, Analyze and Sort Documents with Dispatcher Phoenix.

Using Doc-Classifier, you can recognize, identify, and sort documents based on type using intelligent keyword analysis, with no document specific configuration required. With Dispatcher Phoenix's easy-to-use and intuitive Workflow Builder tool, no programming knowledge is needed. Doc-Classifier reduces errors found in manual document processing operations and frees up employees' time, allowing them to focus on more strategic tasks and responsibilities. Using Dispatcher Phoenix Doc-Classifier, data can be extracts from electronic and paper files. Then, extracted data can be used to group and route multiple document types automatically.

Categorize electronic and paper documents including:

• Structured documents, such as claims, tests, surveys, and questionnaires.

• Semi-structured documents, such as invoices, purchase orders, bills of lading, etc.

• Unstructured documents, including contracts, letters, articles, and memos.

ACCELERATE DOCUMENT CLASSIFICATION WORKFLOWS AT A LOWER COST.

FLEXIBLE AND POWERFUL DOCUMENT CLASSIFICATION

Doc-Classifier offers built-in classification options to speed your workflow and automate the process of identifying and routing documents. Doc-Classifier offers the flexibility of processing both paper and electronic files. During document classification, Doc-Classifier will analyze the contents of your documents to intelligently categorize documents and evaluate the classification for accuracy.

ACCESS TO CRITICAL INFORMATION

Reduce the amount of time it takes for data and documents to reach the correct systems with Doc-Classifier. Route documents directly to Personnel or add additional verification processes to your workflow to ensure the documents validity before distributing the document to its final destination. In addition, Doc-Classifier automatically generates confidence levels to ensure the accuracy of the classification. By reducing manual processing, your document's will arrive at their destination within minutes, empowering employees to make more informed decisions.

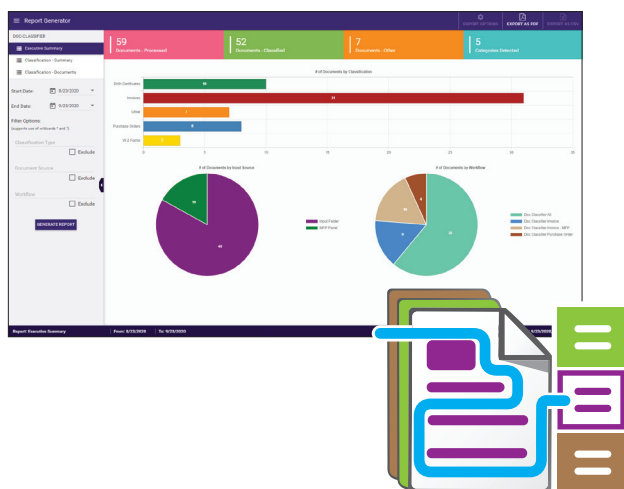

ACCELERATED DOCUMENT PROCESSING

Doc-Classifier is a high-performance module that can accept large volumes of documents and analyze the content of each page to intelligently process structured, semi-structured and unstructured documents within a single operation. Documents can then be routed to a variety of destinations based on their classification. For example, invoices and purchase orders can be routed to accounting, memorandums of understanding can be routed to administrators, contracts can be sent to corporate legal departments and more!

IMPROVED EFFICIENCIES

Take advantage of Dispatcher Phoenix's advanced capture capabilities to classify documents from a variety of sources including scanned documents and electronic files from email, network folders, batch scanning workstations and more. In addition, Dispatcher Phoenix can streamline data extraction or document conversion and distribute documents to network folders, cloud storage solutions, document management systems and more!.

EVALUATE RESULTS

Dispatcher Phoenix Doc-Classifier offers built-in reporting capabilities that give you a birds eye view into the document classification activities being automated across your organization. With Doc-Classifier reporting, you gain additional insight into your workflows including an in-depth analysis of the documents found within your organization. In addition, with built-in Confidence Level analysis, you can ensure the accuracy of classification activities and route documents accordingly.

BUILT TO SUIT YOUR **BUSINESS NEEDS.**

The Dispatcher Phoenix family of automated document workflow solutions also includes:

DISPATCHER PHOENIX SCANTRIP
Perfect for businesses of all sizes, Dispatcher Phoenix ScanTrip simplifies core scanning workflows,including extracting data from paper and electronic files, converting documents to searchable PDFs, distributing documents to popular cloud applications, and more.

DISPATCHER PHOENIX RELEASE2ME+
As a convenient and secure follow-you print solution, Release2Me+ enables organizations to further secure their print and scan-to workflows while utilizing OCR capabilities for data extraction and document conversion.

DISPATCHER PHOENIX
An advanced document processing and workflow automation solution with sophisticated tools for rules-based file distribution. To address the specific needs of our vertical market customers, optional packages are also available to be added onto the Dispatcher Phoenix license, including:

Legal: Speed up and simplify legal document processing with automated Bates stamping, redaction, connectors to document management systems and more.

Education: Advanced features for educators include an automated bubble sheet grading solution, a web-based bubble sheet generator tool and more.

Healthcare: Advanced document workflow for processing, sharing and securing patient information, including a direct connector to OnBase® by Hyland, a secure prescription print solution and Scan-to-EHR capabilities via HL7 Connector and CDA Generator.

Finance: Capture, process and distribute financial documents with automated file conversion, advanced OCR and more.

Government: Helps state and federal agencies manage documents with greater security and accessibility. Includes Dispatcher Phoenix's Copy Defender functionality to secure printed documents, along with support for CAC/PIV authentication and Scan-to-Me/ Scan-to-Home capabilities.

ECM: Manage unstructured content with powerful batch scanning and indexing capabilities. Features a Desktop workstation that connects to any high-speed, TWAIN-based scanner, along with web-based batch indexing, document verification and batch reporting tools.
