KONICA MINOLTA

HEALTHCARE

EHR SCANNING INTEGRATION.
FOR A HEALTHIER PRACTICE.

Streamline patient data capture with Dispatcher Phoenix.
Right from your MFP.

The healthcare industry has become ever more complex, with rapidly changing reimbursement, compliance requirements and technology adoption. However, the one thing that never changes is the industry's reliance on paper. HIPAA consents, medical and family histories, consent-to-treat forms or any other paper-based documentation must be filed in the appropriate location of the patient's Electronic Health Record (EHR) as quickly as possible.

With Dispatcher Phoenix, Konica Minolta's advanced document workflow solution, clinical and administrative staff can use their MFP to securely exchange patient information to an EHR system, following the Health Level 7 industry standard. The Dispatcher Phoenix scan to EHR connector will help you achieve Meaningful Use and improve patient care.

Dispatcher
Phoenix Healthcare

# Transfer Patient Records. Easily and securely. With Dispatcher Phoenix.

Dispatcher Phoenix can integrate with any EHR, radiology information system (RIS), revenue cycle management (RCM) system or similar clinical and business applications that support HL7. This interoperability reduces workflow inefficiencies typically associated with patient record scanning.

STREAMLINED SCANNING AND INPUT

With Dispatcher Phoenix's HL7 Connectivity, staff can securely scan patient information from a Konica Minolta MFP and easily attach that information to the patient record in an EHR. Using Dispatcher Phoenix's intuitive interface at the MFP, staff can easily look up patient data, input additional information such as patient name and medical record number, choose the appropriate document type, and send as an HL7 message to your patient's EHR.

AUTOMATED WORKFLOW

The seamless Dispatcher Phoenix workflow can collect medical documents from various sources, perform advanced processing tasks on the documents such as converting files to Searchable PDF format and then send those files to other healthcare systems.

Scan Documents into Patient's EHR

OTHER FEATURES FOR HEALTHCARE PROFESSIONALS

Protect Personal Health Information
Dispatcher Phoenix provides support for HID authentication, audit trails, file conversion to password-protected PDFs, file encryption, intelligent redaction to protect Personal Health Information (PHI) and more.

Secure Prescription Printing
Dispatcher Phoenix's Rx Shield process automatically applies anti-copy, anti-erasure and pharmacy alerts to prescriptions on plain paper, eliminating the need for costly pre-printed forms.

OnBase Connector
Dispatcher Phoenix offers a direct connector to Hyland's OnBase, a leading ECM platform used by hospitals to manage clinical and back office documents. With Dispatcher Phoenix's OnBase connectivity, medical professionals can index, scan and store their patient records, charts and more, directly in OnBase — right from the MFP panel.

PARTNERSHIP

Konica Minolta can help give shape to your ideas and partner with you to achieve your corporate objectives. Contact us to realize opportunities in:
